CONDITIONS OF SALE

The prices in this catalog cancel all previous prices and are subject to change without notice. All orders for stock are subject to prior sale.

GUARANTEE

This is governed by the Pennsylvania Nurserymen's Association Uniform Retail Replacement Agreement which is as follows: "Provided account is paid within thirty days and plants receive reasonable care, we will replace at one-half price of the plants, plus cost of planting, plants planted in the spring that fail to survive the following summer, or if planted in the fall, fail to leaf out the following spring."

Should we not have the same plants in stock, we reserve the right to give credit for an amount equal to one-half the cost of the plants lost, in other plants of your selection.

DELIVERY CHARGE

Certain items in this catalog include all delivery costs prepaid to your home. These items are Mushroom Manure, Scott's Lawn Seed, Turf Builder, Eisler's Humus, Lawn Mowers, Garden Tractors, Strawberry Plants, etc. Prices on general Nursery Stock does not include delivery, except on large truck load orders to be delivered within fifty miles.

GUARANTEE OF GENUINENESS

All plant materials are warranted by us to be true to name and in a healthy condition. If any stock proves untrue to variety name or to our description under which sold, we will, upon proper evidence, replace the stock at no cost or refund the full purchase price. We shall in no case be responsible for any sum greater than the original purchase price.

TERMS

To those having established credit, we are pleased to extend our regular thirty-day terms. Orders for C. O. D. shipments must be accompanied by at least one-third of the amount of the order.

We sell Tractors, Nursery Stock, Power Mowers, and Landscape Jobs on a twelve (12) monthly payment plan. If interested, please ask for details.

Please address all correspondence to:

Box 70 - Butler, Pa.

Our nurseries located 7 miles west of Butler, on Route 422, are one of the largest in the state and we cordially invite you to visit them. You can see how we start the tiny little cuttings in our own propagation house and then grow them into mature plants to supply our customers.

We grow over 500 varieties of trees and shrubs all of which must be perfectly hardy to endure our Western Pennsylvania winters. You may come to the nurseries any day except Sunday and select the material that you like and have it dug fresh for you, or if you can't come any other day in the week, you are invited to stroll through them on Sunday for we always welcome visitors.

The quality of the stock furnished by us is far superior to that sold by so many brokers, who call themselves Nurseries, and who rely upon supplying cheap southern grown stock. The cost of growing plants in this climate with our short summer is far more than that of the south and in many cases we simply can't compete when price alone is considered, but we take pride in growing and selling quality plants as has been done by our family since 1870.

We maintain a landscape service and will be happy to plant your property for you. We are not landscape architects but recommend their services to you. If you wish detailed plans for large homes and estates, it is money well spent when you secure the services of a professional landscape architect. If our years of practical experience is of assistance to you, we are always happy to give our advice free, for we employ some of the best horticulturists in this locality.

CHRYSANTHEMUMS

We propagate and grow thousands of hardy Chrysanthemums, both in the Cushion type and the taller growing varieties. A large plot of ground across from our Garden Shop - Seven miles West of Butler on Route 422 - is being devoted to the raising of some of the finest "Mums" in America. If you like to see a beautiful display of thousands of flowers all in bloom at one time, we invite you to see our "Mums" in bloom in September and October of each year. You may make your selections and have them dug fresh for you to take home to your garden.

SPRING PLANTING SEASON

Spring is commonly considered the only planting season by many, but not so with us. We grow roses, flowering shrubs, and fruit trees in containers for those who were disappointed with shipped-in Nursery Stock, for those whose home was not ready for planting, or for those who did not have time for Spring planting. These may be planted any time of the year with no risk on your part, for we guarantee them to grow for you.

"I know wherever Heaven is
That roses must be there.
And I have hopes that some rose vines
Will climb the golden stair.
But here on earth I find the gates
Of Paradise ajar,
Nor do I yearn for lovelier things
Beyond the moon and star.
A rose of red is Beauty's heart
A rose of white her soul.
Distil them, Lord, within my cup
And make my spirit whole."

PERENNIALS

We grow a large number of hardy perennials in our gardens not far from our Garden Shop. The varieties grown have been tried and tested not only for hardiness in our cold climate, but they are selected for their quality. Our plants are generally many times larger than the small seedling plants shipped into our area from mail order firms. We dig our plants fresh daily with a ball of the original soil in which they were grown attached to the roots. Our perennials will transplant without wilting and nearly always without any loss. You may select them in full bloom and take them home along for your garden.

LARGE SPECIMEN TREES

These trees are all grown in our own nursery and may be selected and marked by the home owner before moving. The measurement is taken at a point six inches above the ground. It is the diameter of the trunk.

Purchasing of these trees gives the home owner a ten to twenty year saving of time. If you are middle aged, you may have nice shade trees at once and not wait until you are old to enjoy the beauty and comfort.

Prices quoted include the furnishing and planting of the tree complete with a large ball of earth as well as a replacement guarantee. Prices are subject to deviation dependent upon conditions and distances from nursery. Large trees must be planted in holes with good drainage. If planted in heavy clay soil, drainage must be provided for them.

See list of trees available on Pages 57-58 and 59.

"I think that I shall never see
 A poem lovely as a tree,
 A tree whose hungry mouth is prest
 Against the earth's sweet flowing breast;
 A tree that looks at God all day,
 And lifts her leafy arms to pray;
 A tree that may in summer wear
 A nest of robins in her hair;
 Upon whose bosom snow has lain;
 Who intimately lives with rain.
 Poems are made by fools like me,
 But only God can make a tree.

COMPOST: -**"Screened Mushroom Manure Compost"**

We have recently installed a large Royer Shredder at our West Winfield plant and can furnish you with screened Mushroom Manure Compost which makes an excellent top-dressing for lawns or for planting trees and shrubs. We used over two thousand cubic yards of this compost for filling the planting pockets at the new Mellon Square Park in downtown Pittsburgh. Many greenhouses now use this compost for the potting of various type plants. It is rich in organic matter and can be used for planting almost any variety of tree, or shrub. The results are outstanding. A recent test by the Pittsburgh Testing Laboratory shows that it contains 22% organic matter and a full 2% nitrogen.

COMPOST :

We can furnish this screened compost in large truck load quantities delivered anywhere within one hundred and fifty miles, or you may send your truck and haul your own. For prices, delivered, please call our Butler Office. The price loaded on your own truck at West Winfield is only \$5.00 per ton.

MANURE: - MUSHROOM MANURE

Mushroom Manure is real stable manure to which has been added 20% of rich top soil and then used to grow one crop of Mushrooms in the huge limestone caverns at West Winfield in Butler County. The heat of fresh manure is gone, but the organic content and fertility of good barnyard manure is retained.

The high organic content, almost five times that of top soil, is quite valuable in loosening heavy soils and increasing the moisture retention value. It is a long time source of mineral elements which are released gradually through decomposition into the soil.

New studies prove that organic plant foods such as Mushroom Manure are absolutely vital in growing crops for human consumption. They claim that vegetables grown without organic elements are almost valueless in supplying the needs of our body.

A two-inch layer of Mushroom Manure mixed with clay excavation soil will produce a good lasting turf. This makes a much lower cost lawn than the hauling in of some low grade so-called top soil. This has been proven over and over again. It will produce a good lasting turf almost weedless.

For use on a vegetable, or flower garden we recommend from two to four inches spaded into the soil. A generous application will supply your garden with ample plant food for a long time. It loosens the soil, retains moisture and promotes growth. For mulching, or placing around any established plants, we recommend from one to two inches. For roses, it should be placed down in the bed on planting and then use some to mulch them every fall for winter protection. As a top-dressing for lawn either in the fall or winter, we recommend from $\frac{1}{4}$ to $\frac{1}{2}$ inch. It is also used by many gardeners to cover newly seeded lawns to keep them from drying out after seeding.

Mushroom Manure lacks the filth, odor and disease spread in ordinary stable manure for it is sterilized before entering the Mushroom growing plant. This process also kills nearly all weed seeds found in ordinary barnyard manures.
